

Shaker Place Rehabilitation and Nursing Center

Licensure and Certification Surveys

At least annually, the New York State Department of Health conducts surveys to determine skilled nursing facility compliance with federal and state regulations that govern the operations of those facilities. You have the right to review the results of our Facility's most recent survey.

Survey results are available for review in our front lobby.

If you would like additional information about surveys and the survey process, you may access that information on the internet via the CMS (Center for Medicare and Medicaid Surveys) website at the URL: <http://www.medicare.gov/Nursing/Overview.asp>. Once there, you may also then click on "nursing home compare" to learn more about facilities in the Albany Area.
